Education

B.Tech – Computer Science and Engineering, SRKR Engineering College	2023–2027	**CGPA: 6.99**
Class XII, Aditya Junior College, Palakol	2021–2023	**85.3%**
Class X, Aditya School	2021	**93.16%**

Projects

1. Online Food Delivery Application *MongoDB, Express.js, React.js, Node.js*

- Developed a full-stack food delivery platform using the MERN stack with separate customer, admin, and delivery workflows.
- Implemented user authentication, food browsing, cart management, order placement, and order history functionality.
- Built RESTful APIs using Node.js and Express.js with MongoDB for users, food items, carts, and orders.
- Designed responsive React.js interfaces and integrated frontend components with backend APIs for real-time application data.

2. E-Commerce Website *React.js, Node.js, Express.js, MongoDB*

- Developed a full-stack e-commerce platform with user authentication and role-based access control.
- Implemented shopping cart, online payment integration, and order tracking.
- Built RESTful APIs using Express.js and MongoDB for product and order management.
- Improved application performance using lazy loading and optimized database queries.

3. Real-Time Chat Application *React.js, Node.js, Socket.io, MongoDB*

- Developed a real-time chat application supporting one-to-one and group messaging.
- Implemented Socket.io for instant message delivery and typing indicators.
- Integrated JWT authentication for secure user login and session management.
- Stored chat history in MongoDB and optimized API response time.

Experience

Blackbucks Engineers May 2026 – June 2026

MERN Stack Developer Intern

- Engineered responsive user interfaces using React.js, optimizing component reusability and state management.
- Built scalable REST APIs using Node.js and Express.js to facilitate seamless data communication.
- Designed and integrated MongoDB database schemas, streamlining data persistence and API retrieval.
- Managed code versioning using Git/GitHub and collaborated with team members to test and debug application features.

1Stop.ai February 2026 – March 2026

Web Development Intern

- Developed functional web applications using HTML, CSS, and JavaScript.
- Collaborated with peers to design, test, and debug application modules.
- Analyzed dataset trends and built clean data visualizations using Python.
- Completed a hands-on capstone project matching industry standards.

Achievements

- Completed MERN Stack development internship at Blackbucks Engineers, gaining hands-on experience in React.js, Node.js, Express.js, MongoDB, REST APIs, and Git/GitHub.
- Developed multiple full-stack applications involving authentication, CRUD operations, API integration, database management, and real-time communication.
- Earned Java FullStack certification through Eduskills.
- Actively participated in hackathons and college technical events, collaborating with teams to develop software solutions.

Technical Skills

Programming Languages: JavaScript, Java, C++, SQL
Frontend Development: HTML5, CSS3, JavaScript, React.js, Responsive Web Design
Backend Development: Node.js, Express.js, RESTful APIs, API Integration
Database: MongoDB, SQL, Database Design, CRUD Operations
Full Stack: MERN Stack, Authentication, JWT, Role-Based Access, State Management
Real-Time Development: Socket.io, Real-Time Communication
Version Control: Git, GitHub
Development Tools: VS Code, Linux, Postman
Core Subjects: Data Structures, OOP, DBMS, Operating Systems
Soft Skills: Problem Solving, Communication, Teamwork, Time Management

Extra-Curricular Activities

- Volunteered in organizing college technical fests and cultural events, supporting event coordination and team activities.
- Actively participated in hackathons, collaborating with team members to develop software solutions within limited timeframes.
- Participated in coding and technical competitions conducted at the college level, focusing on problem-solving and programming skills.
- Attended workshops and seminars on Web Development, Artificial Intelligence, Cloud Computing, and emerging technologies.
- Collaborated with peers on academic and technical projects, contributing to development, testing, debugging, and documentation activities.
